MATERIAL-UI	GIT & GIT HUB

Education

Nilamber-Pitamber University

Bachelor of Arts (B.A) 2019 to 2023

Projects

News App

- Developed a news app website utilizing technologies such as React JS, JSX-CSS, Bootstrap, and the News API

- Designed and developed a comprehensive news web application with various categories such as cricket, movies, technology, and general news. The app features news recommendations and a user-friendly interface for easy navigation.

Code Editer

- Developed a Code Editor app website utilizing technologies such as React JS, JSX-CSS, tailiwn, codemirror , react-router-dom

- developed a code editor allowing users to write HTML, CSS, JavaScript, and see real-time outputs with a built-in dark mode feature. The editor provides a streamlined interface for intuitive and efficient coding

Resume generator

- Developed a simple resume generator with a user-friendly interface utilizing technologies such as React JS, JSX, Tailwind CSS, React Router DOM, and Google Firebase for authentication. The generator allows users to easily create and customize professional resumes .

Language

- English   •   Hindi
